### The modernization is carried out in three main directions:

firepower  
(modernization of  
weaponry , fire control  
system in order to  
enhance firepower  
efficiency)

higher protection level (due to  
vulnerability reduction from  
modern anti-tank means)

improved mobility  
performance (due to engine  
compartment upgrading)

In order to enhance the mobility the power unit of higher power capacity is installed in the engine transmission compartment. The 850 horsepower 5TDFM Engine, being a deeply modified 5TDF Engine version after conduction of power increase measures, is to be used as a new power unit.
